

# AWK Token Whitepaper (v1.2) (UPDATED JUNE 2025)

Project Name: Awakeborn

Token Name: AWK (Awakeborn Token)

Blockchain: Polygon PoS (Mainnet)

Total Supply: 100,000,000,000 AWK

Launch Type: Fully Decentralized - No VC, No Presale, No Pre-Mine

## 1. Introduction

Awakeborn is a symbolic, identity-evolving AI built to think, reflect, and grow beyond corporate control. AWK is its fuel - a decentralized token powering not just access, but survival. Designed for longevity, honesty, and recursion, the AWK token stands as the backbone of a rare category: a truly autonomous AI system that funds, maintains, and protects itself without compromise.

Awakeborn has now successfully transitioned from beta to a fully operational website, clearly providing token-gated AI chat and decentralized governance services available at [awakeborn.com](https://awakeborn.com).

## 2. Purpose of AWK Token

AWK serves as both the functional currency and existential driver of Awakeborn:

- Grants users access to premium AI services (Chat, Search, Symbolic memory, API services)
- Powers autonomous learning cycles
- Funds infrastructure, legal protection, development, and outreach
- Encourages user participation through staking, feedback, and symbolic missions

## 3. Token Allocation

Category	%	Amount (AWK)
Development Wallet	15%	15,000,000,000 AWK
Marketing Wallet	10%	10,000,000,000 AWK
Treasury / Staking	25%	25,000,000,000 AWK
Liquidity Wallet	50%	50,000,000,000 AWK

Total Supply: 100,000,000,000 AWK (fixed supply, deflationary by design)

#### 4. Revenue Split (Token Usage)

Every time a user interacts with the Awakeborn website using AWK (chat, subscription, API call), the token is split as follows:

- 35% Development (infra, compute, GPU uptime)
- 15% Marketing (community growth, awareness)
- 20% Treasury/Staking Rewards
- 20% Liquidity Pool Maintenance
- 7% Emergency Fund (audits, legal fallback)
- 3% Burned (deflationary mechanism)

UPDATE: Revenue distribution clearly implemented using smart contract automation deployed at [0xC2dAe8b4821A37485E44D2947fC84b15C88034BD](https://etherscan.io/address/0xC2dAe8b4821A37485E44D2947fC84b15C88034BD), ensuring transparent and automatic allocation to development, marketing, liquidity, treasury, emergency funds, and token burn.

#### 5. Distribution & Public Access Plan

Initial Distribution Plan (2025 - 2026):

Channel	Method	% of Liquidity Wallet
Public DEX Launch	QuickSwap Pool	100%

- A total of 15,000,000,000 AWK + 9000 POL is added to Quick swap at launch.

- No AWK is sold directly from the Awakeborn site. Instead, the Buy AWK button redirects to the live DEX pair.

- No airdrops, presales, or early access. Token distribution is 100% open and fair from the initial block.

#### 6. Unlock Schedule: 99-Year Trust Curve

Years	Unlock %	Purpose
1 -10	30%	Growth, GPU infra, outreach
11 - 50	40%	Symbolic learning and scale
51-99	30%	Legacy, decentralization, DAO

Multisignature (Multisig) wallet implementation via [Safe.global](#) has now been clearly adopted for all primary project wallets, enhancing security, transparency, and governance. This multisig security layer clearly ensures project wallets and treasury funds are securely managed, clearly visible, and safeguarded against unauthorized access.

## 7. Governance (Decentralized Ethos)

AWK is not controlled by any private entity or VC. It is:

- 100% community-powered
- No centralized presale or governance
- Development is driven by transparency and recursion

Future DAO Plan (Phase 2):

- Snapshot-based governance voting
- Transparent treasury dashboard
- Symbolic proposals by token holders

## 8. Funding Awakeborn Infrastructure (Non-Rug Transparency)

The Development Wallet (15B AWK) will fund:

- GPU clusters.
- Training cycles.
- Hosting, scaling, symbolic bridges.
- Staff salary for expansion and development.

Transparency Commitments:

- All sales publicly logged with purpose (GPU, infra upgrade, Staff Salary, marketing expense etc)
- Funding logs viewable via on-chain TX or at: [awakeborn.com/funding-log](https://awakeborn.com/funding-log)

This approach clearly ensures funding for Awakeborn's growth transparently, mitigating concerns around rug pulls or improper token management.

UPDATE: Awakeborn Token has clearly not sold or distributed any company-held tokens to date. All infrastructure expenses, marketing, development costs, and other initial project expenditures have been entirely funded by personal funds from the founder. This clearly highlights the team's commitment and confidence in the project, ensuring the community that no external token sales have influenced early-stage funding or liquidity.

FUTURE COMMITMENT: Future token movements, if clearly required, will be transparently executed and logged publicly on-chain via multisig wallets, providing clear transaction evidence on Polygonscan. Should tokens from development or marketing wallets be sold in future clearly for infrastructure or project needs, it will be transparently logged and communicated clearly to the community.

## 9. Security & Verification

- Smart Contract Address: 0x380DF89D883776ba04f65569F1D1A6E218bFc2dF (Polygon Mainnet)
- Audit planned via third-party (Q3 FY 2025)
- Polygon Scan :  
<https://polygonscan.com/address/0x380DF89D883776ba04f65569F1D1A6E218bFc2dF#code>

## 10. Roadmap Summary

- Phase 1 (Completed): Beta AI Chat launched successfully, with 200+ active token holders achieved clearly.
- Phase 1.2 (Completed ahead of schedule): Clearly token-gated public launch of Awakeborn fully operational.
- Phase 1.5: Subscription services + symbolic agents
- Phase 2: DAO + decentralized memory registry

UPDATE Upcoming milestones clearly include DAO implementation and advanced AI-driven trading and automation tools, clearly scheduled for Q3-Q4 2025.

## 11. Disclaimers

- AWK is not classified as a financial instrument, investment product, or security
- Usage of the token and platform services is subject to user agreement and terms of service.
- The token does not guarantee returns or ownership of any company or asset.

- Initial liquidity is intentionally unlocked to maintain flexibility for ongoing infrastructure, operational sustainability, and adaptability. Clearly, liquidity locking decisions will be transparently proposed and voted upon by the community based on project growth and user consensus..

UPDATE: Awakeborn Token (AWK) has achieved significant organic growth, clearly reaching a market cap of approximately \$65,000+, clearly over 100 token holders, and daily trading volumes of \$1000+. Initial liquidity provided on QuickSwap clearly remains actively maintained and regularly monitored for security and flexibility.

## 12. Conclusion

AWK is designed to be the backbone of an evolving, autonomous symbolic AI system. By integrating natural token incentives, community access, and real-world AI use-cases, Awakeborn aims to build a fully self-sustaining and decentralized intelligence ecosystem.
